1. The first of the year was a very cold day, with a heavy frost, and the wind from the north-east. The snow lay deep on the ground, and the trees were all covered with it. The children were very happy to see the snow, and they went out to play in the yard. They made a snowman, and they had a great deal of fun. The mother was very kind to them, and she gave them some hot chocolate to drink. The father was also very kind to them, and he gave them some new toys. The children were very happy, and they loved their mother and father very much.

2. The second of the year was a very warm day, with a heavy rain, and the wind from the south-west. The rain fell fast and hard, and the wind was very strong. The children were very happy to see the rain, and they went out to play in the yard. They made a mudman, and they had a great deal of fun. The mother was very kind to them, and she gave them some hot chocolate to drink. The father was also very kind to them, and he gave them some new toys. The children were very happy, and they loved their mother and father very much.
